

Life Questions to Discuss:

- 1) Imagine you had all the money you would ever need now and in the future.
What will you do with it??

- 2) You have just come from the doctor who told you that you have 5-7 years to live...

How will you change your life?

What will you choose to do with the remaining time you have left?

- 3) The doctor told you this time that you have only ONE day left in your life...

Ask yourselves, what are we/I feeling?

What regrets or longings do you have?

What dreams are unfulfilled?

What do you wish you would have done?

What things you did made you the happiest?
